

YOU MUST CALL FOR INSPECTIONS AT EACH OF THE FOLLOWING STAGES OF CONSTRUCTION

- 1) Open trench footing or post hole pier inspection with any required rebar in place.
- 2) Pre-pour foundation inspection, including any deck footings, with all rebar wired in place. Residential foundations require a 5/8" x 20' rebar for an electrical grounding rod.
- 3) Plumbing or mechanical groundwork inspection before covering or backfilling.
- 4) Reinforced concrete – Pre-pour inspection.
- 5) Framing or building structure inspection before insulating or dry walling.
- 6) Plumbing, Mechanical, and State electrical inspection, when required, for any rough-in.
- 7) State Fire Marshal inspection, when required, of any Commercial or industrial projects.
- 8) Insulation inspection.
- 9) Deck, patio, driveway, sidewalk, and any Egress window installation inspection.
- 10) Any water, sewer, and/or storm sewer trenching needs to be inspected while open, with pipes laid, and uncovered or bedded.
- 11) Final Occupancy inspection must be approved before moving into, or occupying in any fashion, all permitted structures.
